

PRODUCT INFORMATION

| | |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Category | Speciality Filled & Reinforced Polypropylene Compound |
| Grade Name | LF PP 3010 |
| Features | 30% Chemically Coupled Long Glass Fiber Reinforced Polypropylene Compound in Natural Colour with very high Mechanical Properties. Material with Special Additives and Colours* are available on demand. |
| Application | Automotive and Appliances |
| Component | FEM, Gear Shifter, Spoilers, SFM parts, Rotors, Fan Blades etc. |

| Typical Properties | ASTM Method | Units | Typical Value |
|---------------------------|--------------------|--------------|----------------------|
| Specific Gravity | D 792 | — | 1.13 ± 0.02 |
