Tipco Industries Private Limited

## PRODUCT INFORMATION

Category	Tipcolite <sup>®</sup> - Advanced Phenolic Moulding Compound		
Grade Name	THD 411/35 PI		
Features	Soft Flow, Mica, and Cellulose Reinforced Phenolic Moulding Powder with High Density, Low Shrinkage, Good Surface Finish, Electrical & Mechanical, Properties, Dimensional Stability, Insulating and Water Resistance, suitable for Injection Moulding		
Applications	Electrical, Electronics, and Industrial		
Components	Relay Base Cover, Relay Parts, Connectors, Ignition /solenoid caps, Spark plug cap etc.		

Typical Property	Method	Units	Typical Value
Specific Gravity	TRN-33		1.73
Apparent Density	TRM-37	grams/cc	0.80
