

PRODUCT INFORMATION

Category **Tipcolite® - Advanced Phenolic Moulding Material**

Grade Name **Tipcolite CN 5160 C**

Features **Pultruded Fabric Phenolic Moulding material, having extremely high mechanical properties, long term durability and specifically suitable for high performance engineering components, using compression moulding technique. Available in Brown colour**

Applications **High shock resistant components**

Components **Bush, Sleeves, high performance Wheels and Pulleys, etc**

Typical Property	Method	Units	Typical Value
Mould Shrinkage	TMP-13	%	0.40
Water Absorption	TMP-16	mg	75
